

8. Create a virtual Hard Disk and allocate the storage using VM Work Workstation.

Aim:-

To create a virtual Hard Disk using VM Work Workstation Pro.

Procedure:-

→ open VMware workstation Pro and select the virtual machine you want to create the virtual hard disk.

→ click on the edit virtual machine settings option.

→ In the virtual machine settings window click on Add

→ Select the Disk and click Next

→ choose whether to create a new virtual disk or use an existing one, and click Next

✓ → select the disk type and click next

→ choose the disk space (or) just a certain amount and click Next

→ choose the disk file location and name and click Next

→ Review the settings and click Finish.

you have now created a virtual hard disk and allocated storage for your virtual machine.
